

 **HERMANHR™**

HUMAN RISK MANAGEMENT

 **REMOTELYME**

Security & HR teams lack visibility

Our HRM software & services deliver insights & improvements in 9 minutes

Traditional Recruiting & Training

No Predictive Risk Scores

Who is the best fit for role, trust, culture, team & soft skills?

Low Participation, No Personalization

Which courses are needed to improve trust, engagement & soft skills?

No Adaptive Insights

Who can be a manager, hybrid, or have access to sensitive data?

No HRM

Annual surveys don't improve engagement.

Studies show that traditional recruiting and training may only be 10% effective and needs to be replaced with Human Risk Management (HRM). Why? Because Gallup says 77% of workers are disengaged and make 60% more mistakes, leading to 70% more safety incidents and much higher attrition rates. In contrast, Deloitte research says high trust employees drive 400% more business performance, 88% more customer loyalty, and 79% more productivity. But how can we measure and improve trust? Neuroscientists know it's related to brain oxytocin. RemotelyMe's Career Quotient Indicator Assessment only takes nine minutes, has a 92% approval rating and 93% validity (as compared to 67% for others), and uniquely determines trust, risks, soft skills, leadership, and learning styles. Our platform then prescribes dynamically personalized training for security awareness, soft skills, management, hybrid work, and more.

"This is what every CHRO should know before hiring, promoting, or training employees -CHRO, Leading Healthcare Firm

It's time to stop paying too much and not getting enough. RemotelyMe's **HERMAN HR™** costs less and transcends L&D in three key ways:

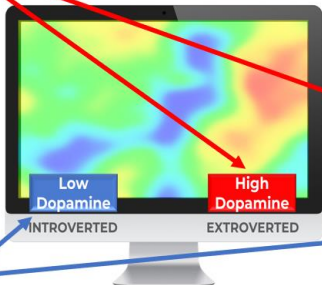

- **INSIGHTS:** Human Risk Management insights into risks, security, engagement, and compliance
- **PERSONALIZATION:** Personalized, effective training to improve employee security, engagement, and culture
- **IMPROVEMENT:** Security, trust, engagement, and compliance improvement trends and validation

"RemotelyMe offers unique technology that could make them an HRM leader, including the behavioral science Gartner and Forrester say is a key requirement that's missing from other solutions." -Rob Smith, former Gartner Security Analyst

HERMANHR™

Predictive Risk Scores

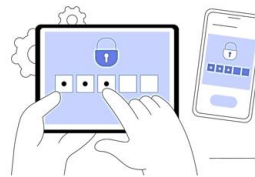

Know who's at risk in only nine minutes.

Personalized Training & Hiring

Recruiting & training based on risks & roles.

Adaptive Insights

Personalize access & authority based on data.

HRM

Behavioral science training increases retention 16X.

Managed HRM Services

Limited team and time to implement HRM? No worries, we do it all for you at low cost!
